## Power Grower Seminar

**Featuring John Kempf of Advancing Eco Agriculture**

**Friday, February 19, 2016, 8:30 AM - 3 PM**

At this event, John will focus on how to produce the greatest crop response possible with the least amount of input cost. In the current economic conditions, broad acre crop farmers need to focus on generating revenue with very tightly managed budgets.

John will describe how to target nutrient applications at Critical Points of Influence (CPI's), to produce substantial yield increases with targeted inputs that can still deliver a strong ROI even in the current economic situation.

John will also discuss how to rapidly and inexpensively build soil organic matter while growing commercial broad acre crops, and how to produce a disease suppressive soil that actively suppresses possible disease organisms.

John Kempf is an internationally recognized lecturer who has spoken to audiences across the country about biological agriculture and whole farm productivity.

If you want to learn more about biological and regenerative farming systems, and you want to take your knowledge one step further, this event is definitely for you.

A free lunch will be provided.

To register call 800-495-6603. Preregistration is required.

### Agenda:

8:30 Registration  
9:00 Driving yields economically  
9:30 Developing disease resistance  
10:30 Break  
11:00 Building soil with commercial crops  
11:45 Lunch (provided)  
1:30 Real world management that makes money  
2:30 Q and A

This event will be held at the Majestic Theater and Restaurant, 420 Main Street, Scott City, KS 67871.
